

# Framing Information

## Multi item Framing (multi aperture)

Any mount/frame with more than one window is a multi aperture mount. This can take many forms but is most commonly used with photographic collections, family events, holidays, pets and sporting occasions for example. Other uses are stamp, coin, cigarette cards and other collections.

With our latest mount-cutting computer software, laying out and cutting a design can be done very accurately with any combination of various sized rectangles, squares, circles, ovals or even abstract shapes.

## Preparation

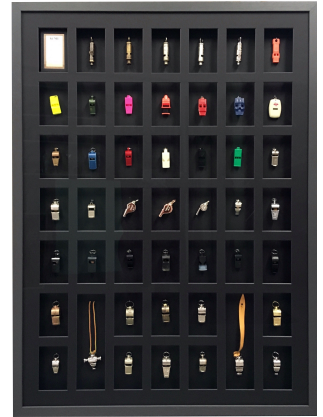

All items are framed to conservation standards with items being stitched onto a conservation backing board if possible. All procedures are reversible and no tapes or adhesives are used on the items, as these can cause irreversible damage and reduce the longevity and value. UV Glass or invisible Art Glass can be used to further protect and enhance.

## Cost

The cost depends on a number of factors and it is best to visit our studio with the items you want included so we can inspect, measure and determine what process needs to take place.

During the visit you will get to see all the options available including frame, mount and glass choice and we can discuss design layout.

Prices start from £100 and depend on the factors mentioned above.
